

## Why C-Leanship ?

- Cleaning possible in Terminals during cargo & bunker operations.
- Able to clean the biggest vessels in terminal during one port call.
- No additional wear and tear to the paint.
- Accurate documentation thank to our DCL.
- Significant fuel saving that last longer.
- Clean your vessel often to increase fuel saving.
- No limitation due to deep draft & night time.
- No added cost due to vessel off-hire and delays.
- Environmentally friendly

Can you afford not to take advantage of our services?

# Providing tomorrow's sustainable underwater services.

C-LEANSHIP A/S 

#### Introduction

**We are an underwater hull cleaning provider using state of the art ROV and Waterjet Technology.**

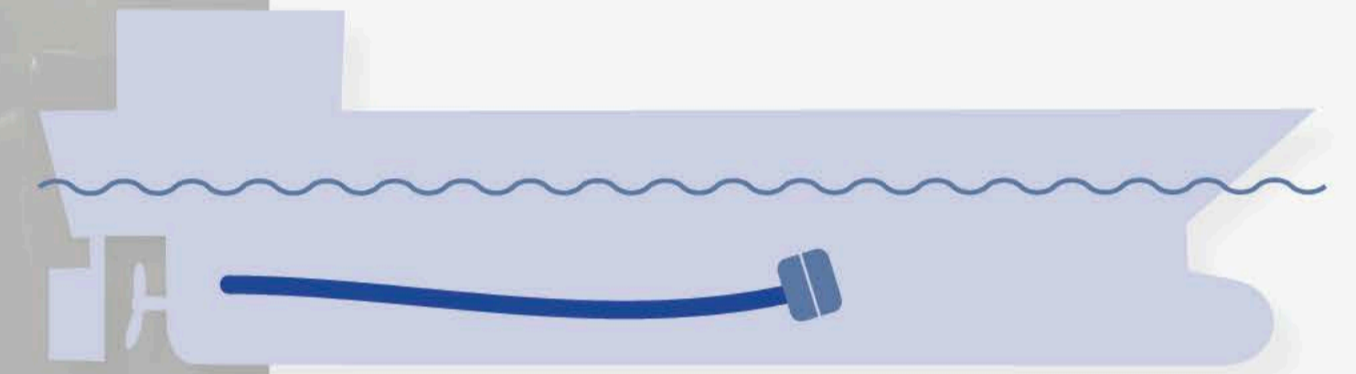

We continuously develop and operate our own machines to create the best service available.

#### Digital Cleaning Log

**Underwater positioning system.**

Allowing us to know the exact location of the ShipShiner and provide detailed information regarding cleaned areas.

#### Technology

**We design, develop and improve our own technology.**

Amongst others: Digital navigation, Washing Units, Reporting system etc.

#### SIMOPS

**The ability & flexibility to clean in terminals while vessels are doing cargo & bunkering operation.**
